INVEGA TRINZA (paliperidone palmitate extended-release injectable suspension)

POLICY

I. INDICATIONS

The indications below including FDA-approved indications and compendial uses are considered a covered benefit provided that all the approval criteria are met and the member has no exclusions to the prescribed therapy.

FDA-Approved Indication

Invega Trinza (paliperidone palmitate), a 3-month injection, is indicated for the treatment of schizophrenia in patients after they have been adequately treated with Invega Sustenna (1-month paliperidone palmitate extended-release injectable suspension) for at least four months.

All other indications are considered experimental/investigational and are not a covered benefit.

II. CRITERIA FOR APPROVAL

An authorization may be granted for 12 months when the following criteria (A) and (B) are met:

- A. The requested drug is being prescribed for the treatment of schizophrenia
- B. The patient has been adequately treated with Invega Sustenna for at least four months
