Check to see if Diagnosis Code (ICD code) is on this list (please note list for diagnois continues for many pages), if so procede to see if the Procedure code (CPT, HCPC) is on either Genomic or Radiation Oncology list. IF Check to see it Diagnosis Code (ICU code) is on this list (please note list for diagnosis continues for many pages), it so procede to see it to both are on the list please send the request to New Century Health in one of two ways:

1) Log into NCH provider portal: https://my.newcenturyhealth.com or

2) Call NCH at 1-888-999-7713 Medical Oncology and Genomic/Genetic testing- Option 1 Radiation Oncology - Option 2

IF you are an Out of Network provider please send request directly to NHPRI even if codes are on both lists.

           Kaposi's sarcoma of palate
                                                                                 81216
                                                                                             Brca2 (Brca2, Dna Repair Associated) (Eg, Hereditary Breast And Ovarian Cancer) Gene Analysis; Full Sequence Analysis
C46.3
            Kaposi's sarcoma of lymph nodes
                                                                                  81216
                                                                                             Brca2 (Brca2, Dna Repair Associated) (Eg, Hereditary Breast And Ovarian Cancer) Gene Analysis; Full Sequence Analysis
C46 4
           Kaposi's sarcoma of gastrointestinal sites
                                                                                 81216
                                                                                             Brca2 (Brca2, Dna Repair Associated) (Eg, Hereditary Breast And Ovarian Cancer) Gene Analysis; Full Sequence Analysis
           Kaposi's sarcoma of unspecified lung
                                                                                             Brca2 (Brca2, Dna Repair Associated) (Eg, Hereditary Breast And Ovarian Cancer) Gene Analysis; Known Familial Variant
C46.50
                                                                                 81217
                                                                                             Brca2 (Brca2, Dna Repair Associated) (Eg, Hereditary Breast And Ovarian Cancer) Gene Analysis; Known Familial Variant
C46.51
           Kaposi's sarcoma of right lung
                                                                                 81217
C46.52
           Kaposi's sarcoma of left lung
                                                                                  81217
                                                                                             Brca2 (Brca2, Dna Repair Associated) (Eg, Hereditary Breast And Ovarian Cancer) Gene Analysis; Known Familial Variant
C46.7
            Kaposi's sarcoma of other sites
                                                                                 81218
                                                                                             Cebpa (Ccaat/Enhancer Binding Protein [C/Ebp], Alpha) (Eg, Acute Myeloid Leukemia), Gene Analysis, Full Gene Sequence
C46.9
           Kaposi's sarcoma, unspecified
                                                                                  81218
                                                                                             Cebpa (Ccaat/Enhancer Binding Protein [C/Ebp], Alpha) (Eg, Acute Myeloid Leukemia), Gene Analysis, Full Gene Sequence
C47.0
           Malignant neoplasm of peripheral nerves of head, face and neck
                                                                                             Cebpa (Ccaat/Enhancer Binding Protein [C/Ebp], Alpha) (Eg, Acute Myeloid Leukemia), Gene Analysis, Full Gene Sequence
                                                                                 81218
C47.10
           Malignant neoplasm of peripheral nerves of unspecified upper limb, in 81219
                                                                                             Calr (Calreticulin) (Eg, Myeloproliferative Disorders), Gene Analysis, Common Variants In Exon 9
C47.11
           Malignant neoplasm of peripheral nerves of right upper limb, including 81219
                                                                                             Calr (Calreticulin) (Eg, Myeloproliferative Disorders), Gene Analysis, Common Variants In Exon 9
C47.12
            Malignant neoplasm of peripheral nerves of left upper limb, including $ 81219
                                                                                             Calr (Calreticulin) (Eg, Myeloproliferative Disorders), Gene Analysis, Common Variants In Exon 9
C47.20
           Malignant neoplasm of peripheral nerves of unspecified lower limb, in 81232
                                                                                             Dpyd (Dihydropyrimidine Dehydrogenase) (Eg, 5-Fluorouracil/5-Fu And Capecitabine Drug Metabolism), Gene Analysis, Con
C47.21
           Malignant neoplasm of peripheral nerves of right lower limb, including 81232
                                                                                             Dpyd (Dihydropyrimidine Dehydrogenase) (Eg, 5-Fluorouracil/5-Fu And Capecitabine Drug Metabolism), Gene Analysis, Con
C47.22
           Malignant neoplasm of peripheral nerves of left lower limb, including h 81232
                                                                                             Dpyd (Dihydropyrimidine Dehydrogenase) (Eg, 5-Fluorouracil/5-Fu And Capecitabine Drug Metabolism), Gene Analysis, Con
C47.3
           Malignant neoplasm of peripheral nerves of thorax
                                                                                 81235
                                                                                             Egfr (Epidermal Growth Factor Receptor) (Eg, Non-Small Cell Lung Cancer) Gene Analysis, Common Variants (Eg, Exon 19
C47.4
           Malignant neoplasm of peripheral nerves of abdomen
                                                                                             Egfr (Epidermal Growth Factor Receptor) (Eg, Non-Small Cell Lung Cancer) Gene Analysis, Common Variants (Eg, Exon 19
                                                                                 81235
C47.5
           Malignant neoplasm of peripheral nerves of pelvis
                                                                                             Egfr (Epidermal Growth Factor Receptor) (Eg, Non-Small Cell Lung Cancer) Gene Analysis, Common Variants (Eg, Exon 19
C47.6
           Malignant neoplasm of peripheral nerves of trunk, unspecified
                                                                                 81236
                                                                                             Ezh2 (Enhancer Of Zeste 2 Polycomb Repressive Complex 2 Subunit) (Eg, Myelodysplastic Syndrome, Myeloproliferative Ne
                                                                                             Ezh2 (Enhancer Of Zeste 2 Polycomb Repressive Complex 2 Subunit) (Eg, Myelodysplastic Syndrome, Myeloproliferative Ne
C47.8
           Malignant neoplasm of overlapping sites of peripheral nerves and auto \underline{81236}
C47.9
           Malignant neoplasm of peripheral nerves and autonomic nervous syste 81236
                                                                                             Ezh2 (Enhancer Of Zeste 2 Polycomb Repressive Complex 2 Subunit) (Eg, Myelodysplastic Syndrome, Myeloproliferative Ne Ezh2 (Enhancer Of Zeste 2 Polycomb Repressive Complex 2 Subunit) (Eg, Diffuse Large B-Cell Lymphoma) Gene Analysis,
C48.0
           Malignant neoplasm of retroperitoneum
                                                                                 81237
C48.1
           Malignant neoplasm of specified parts of peritoneum
                                                                                 81237
                                                                                             Ezh2 (Enhancer Of Zeste 2 Polycomb Repressive Complex 2 Subunit) (Eg, Diffuse Large B-Cell Lymphoma) Gene Analysis,
                                                                                             Ezh2 (Enhancer Of Zeste 2 Polycomb Repressive Complex 2 Subunit) (Eg, Diffuse Large B-Cell Lymphoma) Gene Analysis,
C48.2
            Malignant neoplasm of peritoneum, unspecified
C48 8
           Malignant neoplasm of overlapping sites of retroperitoneum and perit 81245
                                                                                             Flt3 (Fms-Related Tyrosine Kinase 3) (Eg, Acute Myeloid Leukemia), Gene Analysis; Internal Tandem Duplication (Itd) Varia
C49.0
           Malignant neoplasm of connective and soft tissue of head, face and ne 81245
                                                                                             Flt3 (Fms-Related Tyrosine Kinase 3) (Eg, Acute Myeloid Leukemia), Gene Analysis; Internal Tandem Duplication (Itd) Varia
C49.10
           Malignant neoplasm of connective and soft tissue of unspecified upper 81245
                                                                                             Flt3 (Fms-Related Tyrosine Kinase 3) (Eg, Acute Myeloid Leukemia), Gene Analysis; Internal Tandem Duplication (Itd) Varia
C49.11
           Malignant neoplasm of connective and soft tissue of right upper limb, i 81246
                                                                                             Flt3 (Fms-Related Tyrosine Kinase 3) (Eg, Acute Myeloid Leukemia), Gene Analysis; Tyrosine Kinase Domain (Tkd) Variants
C49.12
           Malignant neoplasm of connective and soft tissue of left upper limb, in 81246
                                                                                             Flt3 (Fms-Related Tyrosine Kinase 3) (Eg, Acute Myeloid Leukemia), Gene Analysis; Tyrosine Kinase Domain (Tkd) Variants
C49.20
           Malignant neoplasm of connective and soft tissue of unspecified lower 81246
                                                                                             Flt3 (Fms-Related Tyrosine Kinase 3) (Eg, Acute Myeloid Leukemia), Gene Analysis; Tyrosine Kinase Domain (Tkd) Variants
C49.21
           Malignant neoplasm of connective and soft tissue of right lower limb, i 81261
                                                                                             Igh@ (Immunoglobulin Heavy Chain Locus) (Eg, Leukemias And Lymphomas, B-Cell), Gene Rearrangement Analysis To De

C50.412
               Malignant neoplasm of upper-outer quadrant of left female breast
                                                                                                           81301
                                                                                                                           Microsatellite Instability Analysis (Eg, Hereditary Non-Polyposis Colorectal Cancer, Lynch Syndrome) Of Markers For Misma
                                                                                                                          Microsatellite Instability Analysis (Eg, Hereditary Non-Polyposis Colorectal Cancer, Lynch Syndrome) Of Markers For Misma
C50.419
               Malignant neoplasm of upper-outer quadrant of unspecified female br 81301
C50.421
               Malignant neoplasm of upper-outer quadrant of right male breast
                                                                                                                           Palb2 (Partner And Localizer Of Brca2) (Eg, Breast And Pancreatic Cancer) Gene Analysis; Full Gene Sequence
               Malignant neoplasm of upper-outer quadrant of left male breast
                                                                                                           81307
                                                                                                                           Palb2 (Partner And Localizer Of Brca2) (Eg, Breast And Pancreatic Cancer) Gene Analysis; Full Gene Sequence
C50.429
              Malignant neoplasm of upper-outer quadrant of unspecified male be
                                                                                                          81307
                                                                                                                           Palb2 (Partner And Localizer Of Brca2) (Eg, Breast And Pancreatic Cancer) Gene Analysis; Full Gene Sequence
              Malignant neoplasm of lower-outer quadrant of right female breast
                                                                                                           81308
                                                                                                                          Palb2 (Partner And Localizer Of Brca2) (Eg, Breast And Pancreatic Cancer) Gene Analysis; Known Familial Variant
C50.511
C50.512
               Malignant neoplasm of lower-outer quadrant of left female breast
                                                                                                           81308
                                                                                                                          Palb2 (Partner And Localizer Of Brca2) (Eg, Breast And Pancreatic Cancer) Gene Analysis; Known Familial Variant
              Malignant neoplasm of lower-outer quadrant of unspecified female bri 81308
                                                                                                                           Palb2 (Partner And Localizer Of Brca2) (Eg. Breast And Pancreatic Cancer) Gene Analysis; Known Familial Variant
C50.519
                                                                                                                           Pik3Ca (Phosphatidylinositol-4, 5-Biphosphate 3-Kinase, Catalytic Subunit Alpha) (Eg, Colorectal And Breast Cancer) Gene A
               Malignant neoplasm of lower-outer quadrant of right male breast
C50.522
              Malignant neoplasm of lower-outer quadrant of left male breast
                                                                                                           81309
                                                                                                                          Pik3Ca (Phosphatidylinositol-4, 5-Biphosphate 3-Kinase, Catalytic Subunit Alpha) (Eg, Colorectal And Breast Cancer) Gene A
C50.529
               Malignant neoplasm of lower-outer quadrant of unspecified male brea 81309
                                                                                                                          Pik3Ca (Phosphatidylinositol-4, 5-Biphosphate 3-Kinase, Catalytic Subunit Alpha) (Eg, Colorectal And Breast Cancer) Gene A
C50.611
              Malignant neoplasm of axillary tail of right female breast
                                                                                                           81310
                                                                                                                           Npm1 (Nucleophosmin) (Eg, Acute Myeloid Leukemia) Gene Analysis, Exon 12 Variants
              Malignant neoplasm of axillary tail of left female breast
                                                                                                                           Npm1 (Nucleophosmin) (Eg. Acute Myeloid Leukemia) Gene Analysis, Exon 12 Variants
C50.612
                                                                                                           81310
               Malignant neoplasm of axillary tail of unspecified female breast
                                                                                                                          Npm1 (Nucleophosmin) (Eg, Acute Myeloid Leukemia) Gene Analysis, Exon 12 Variants

C57.12
                Malignant neoplasm of left broad ligament
                                                                                                              81342
                                                                                                              81342
                                                                                                                              Trg@ (T Cell Antigen Receptor, Gamma) (Eg, Leukemia And Lymphoma), Gene Rearrangement Analysis, Evaluation To Del
C57.20
                Malignant neoplasm of unspecified round ligament
               Malignant neoplasm of right round ligament
                                                                                                              81347
                                                                                                                              Sf3B1 (Splicing Factor [3B] Subunit B1) (Eg, Myelodysplastic Syndrome/Acute Myeloid Leukemia) Gene Analysis, Common
C57.21
C57.22
               Malignant neoplasm of left round ligament
                                                                                                              81347
                                                                                                                              Sf3B1 (Splicing Factor [3B] Subunit B1) (Eg, Myelodysplastic Syndrome/Acute Myeloid Leukemia) Gene Analysis, Common
C57.3
                Malignant neoplasm of parametrium
                                                                                                              81347
                                                                                                                              Sf3B1 (Splicing Factor [3B] Subunit B1) (Eg, Myelodysplastic Syndrome/Acute Myeloid Leukemia) Gene Analysis, Common
                Malignant neoplasm of uterine adnexa, unspecified
                                                                                                              81348
                                                                                                                              Srsf2 (Serine And Arginine-Rich Splicing Factor 2) (Eg, Myelodysplastic Syndrome, Acute Myeloid Leukemia) Gene Analysis
C57.4
                Malignant neoplasm of other specified female genital organs
                                                                                                              81348
                                                                                                                              Srsf2 (Serine And Arginine-Rich Splicing Factor 2) (Eg, Myelodysplastic Syndrome, Acute Myeloid Leukemia) Gene Analysis
C57.7
                                                                                                                              Srsf2 (Serine And Arginine-Rich Splicing Factor 2) (Eg, Myelodysplastic Syndrome, Acute Myeloid Leukemia) Gene Analysis
C57.8
                Malignant neoplasm of overlapping sites of female genital organs
                                                                                                               81348
C57.9
                Malignant neoplasm of female genital organ, unspecified
                                                                                                              81350
                                                                                                                              Ugt1A1 (Udp Glucuronosyltransferase 1 Family, Polypeptide A1) (Eg, Drug Metabolism, Hereditary Unconjugated Hyperbilin
C58
               Malignant neoplasm of placenta
                                                                                                              81350
                                                                                                                              Ugt1A1 (Udp Glucuronosyltransferase 1 Family, Polypeptide A1) (Eg, Drug Metabolism, Hereditary Unconjugated Hyperbilin
                                                                                                                              Ugt1A1 (Udp Glucuronosyltransferase 1 Family, Polypeptide A1) (Eg, Drug Metabolism, Hereditary Unconjugated Hyperbiling
C60.0
               Malignant neoplasm of prepuce
                                                                                                              81350
C60.1
               Malignant neoplasm of glans penis
                                                                                                              81351
                                                                                                                              Tp53 (Tumor Protein 53) (Eg, Li-Fraumeni Syndrome) Gene Analysis; Full Gene Sequence
C60.2
                Malignant neoplasm of body of penis
                                                                                                              81351
                                                                                                                              Tp53 (Tumor Protein 53) (Eg, Li-Fraumeni Syndrome) Gene Analysis; Full Gene Sequence
                Malignant neoplasm of overlapping sites of penis
                                                                                                              81351
                                                                                                                              Tp53 (Tumor Protein 53) (Eg, Li-Fraumeni Syndrome) Gene Analysis; Full Gene Sequence
C60.8
C60.9
               Malignant neoplasm of penis, unspecified
                                                                                                              81352
                                                                                                                              Tp53 (Tumor Protein 53) (Eg, Li-Fraumeni Syndrome) Gene Analysis; Targeted Sequence Analysis (Eg, 4 Oncology)
C61
                Malignant neoplasm of prostate
                                                                                                              81352
                                                                                                                              Tp53 (Tumor Protein 53) (Eg, Li-Fraumeni Syndrome) Gene Analysis; Targeted Sequence Analysis (Eg, 4 Oncology)
               Malignant neoplasm of unspecified undescended testis
                                                                                                              81352
                                                                                                                              Tp53 (Tumor Protein 53) (Eg, Li-Fraumeni Syndrome) Gene Analysis; Targeted Sequence Analysis (Eg, 4 Oncology)
C62.00
               Malignant neoplasm of undescended right testis
                                                                                                                              Tp53 (Tumor Protein 53) (Eg, Li-Fraumeni Syndrome) Gene Analysis; Known Familial Variant

C63.02
                Malignant neoplasm of unspecified spermatic cord
                                                                                                              81403
                                                                                                                              Molecular Pathology Procedure Level 4
C63.10
C63.11
                Malignant neoplasm of right spermatic cord
                                                                                                              81403
                                                                                                                              Molecular Pathology Procedure Level 4
                Malignant neoplasm of left spermatic cord
                                                                                                              81403
                                                                                                                              Molecular Pathology Procedure Level 4
C63.12
C63.2
                Malignant neoplasm of scrotum
                                                                                                              81435
                                                                                                                              Hereditary Colon Cancer Disorders; Genomic Sequence Analysis Panel, Must Include Sequencing Of At Least 10 Genes, Include Sequencing Of At Least 10 Genes, Include Sequence Analysis Panel, Must Include Sequencing Of At Least 10 Genes, Include Sequence Analysis Panel, Must Include Sequencing Of At Least 10 Genes, Include Sequence Analysis Panel, Must Include Sequence Analysis Panel, Must Include Sequencing Of At Least 10 Genes, Include Sequence Analysis Panel, Must Include Analysis P
                Malignant neoplasm of other specified male genital organs
C63.7
                                                                                                              81435
                                                                                                                              Hereditary Colon Cancer Disorders; Genomic Sequence Analysis Panel, Must Include Sequencing Of At Least 10 Genes, Include Sequencing Of At Least 10 Genes, Include Sequence Analysis Panel, Must Include Sequencing Of At Least 10 Genes, Include Sequence Analysis Panel, Must Include Sequencing Of At Least 10 Genes, Include Sequence Analysis Panel, Must Include Sequencing Of At Least 10 Genes, Include Sequence Analysis Panel, Must Include Analysis Panel, Must Include
C63.8
                Malignant neoplasm of overlapping sites of male genital organs
                                                                                                              81435
                                                                                                                              Hereditary Colon Cancer Disorders; Genomic Sequence Analysis Panel, Must Include Sequencing Of At Least 10 Genes, Inclu
C63.9
                Malignant neoplasm of male genital organ, unspecified
                                                                                                               81436
                                                                                                                              Hereditary Colon Cancer Disorders; Duplication/Deletion Analysis Panel, Must Include Analysis Of At Least 5 Genes, Including
                                                                                                              81436
C64.1
                Malignant neoplasm of right kidney, except renal pelvis
                                                                                                                              Hereditary Colon Cancer Disorders; Duplication/Deletion Analysis Panel, Must Include Analysis Of At Least 5 Genes, Including
C64.2
               Malignant neoplasm of left kidney, except renal pelvis
                                                                                                               81436
                                                                                                                              Hereditary Colon Cancer Disorders; Duplication/Deletion Analysis Panel, Must Include Analysis Of At Least 5 Genes, Including
C64.9
                Malignant neoplasm of unspecified kidney, except renal pelvis
                                                                                                              81445
                                                                                                                              Targeted Genomic Sequence Analysis Panel, Solid Organ Neoplasm, Dna Analysis, And Rna Analysis When Performed, 5-50
C65.1
                Malignant neoplasm of right renal pelvis
                                                                                                                              Targeted Genomic Sequence Analysis Panel, Solid Organ Neoplasm, Dna Analysis, And Rna Analysis When Performed, 5-50
                                                                                                              81445
C65.2
                Malignant neoplasm of left renal pelvis
                                                                                                               81445
                                                                                                                              Targeted Genomic Sequence Analysis Panel, Solid Organ Neoplasm, Dna Analysis, And Rna Analysis When Performed, 5-50
C65.9
                Malignant neoplasm of unspecified renal pelvis
                                                                                                               81450
                                                                                                                              Targeted Genomic Sequence Analysis Panel, Hematolymphoid Neoplasm Or Disorder, Dna Analysis, And Rna Analysis When
C66.1
               Malignant neoplasm of right ureter
                                                                                                              81450
                                                                                                                              Targeted Genomic Sequence Analysis Panel, Hematolymphoid Neoplasm Or Disorder, Dna Analysis, And Rna Analysis When
C66.2
                Malignant neoplasm of left ureter
                                                                                                              81450
                                                                                                                              Targeted Genomic Sequence Analysis Panel, Hematolymphoid Neoplasm Or Disorder, Dna Analysis, And Rna Analysis When
C66.9
                Malignant neoplasm of unspecified ureter
                                                                                                              81455
                                                                                                                              Targeted Genomic Sequence Analysis Panel, Solid Organ Or Hematolymphoid Neoplasm, Dna Analysis, And Rna Analysis W
C67.0
               Malignant neoplasm of trigone of bladder
                                                                                                                              Targeted Genomic Sequence Analysis Panel, Solid Organ Or Hematolymphoid Neoplasm, Dna Analysis, And Rna Analysis W
                                                                                                              81455
                                                                                                                              Targeted Genomic Sequence Analysis Panel, Solid Organ Or Hematolymphoid Neoplasm, Dna Analysis, And Rna Analysis W
C67.1
                Malignant neoplasm of dome of bladder
                                                                                                              81455
C67.2
               Malignant neoplasm of lateral wall of bladder
                                                                                                              81479
                                                                                                                              Unlisted Molelcular Pathology Procedure (Foundationonce Liquid Cdx)
C67.3
                Malignant neoplasm of anterior wall of bladder
                                                                                                              81479
                                                                                                                              Unlisted Molelcular Pathology Procedure (Foundationonce Liquid Cdx)
C67.4
               Malignant neoplasm of posterior wall of bladder
                                                                                                              81479
                                                                                                                              Unlisted Molelcular Pathology Procedure (Foundationonce Liquid Cdx)
                                                                                                                              Oncology (Tissue Of Origin), Microarray Gene Expression Profiling Of > 2000 Genes, Utilizing Formalin-Fixed Paraffin-Emb
C67.5
                Malignant neoplasm of bladder neck
                                                                                                              81504
                Malignant neoplasm of ureteric orifice
                                                                                                              81504
                                                                                                                              Oncology (Tissue Of Origin), Microarray Gene Expression Profiling Of > 2000 Genes, Utilizing Formalin-Fixed Paraffin-Embersion
C67.6
                                                                                                                              Oncology (Tissue Of Origin), Microarray Gene Expression Profiling Of > 2000 Genes, Utilizing Formalin-Fixed Paraffin-Emb
C67.7
                Malignant neoplasm of urachus
                                                                                                               81504
C67.8
                Malignant neoplasm of overlapping sites of bladder
                                                                                                               81518
                                                                                                                              Oncology (Breast), Mrna, Gene Expression Profiling By Real-Time Rt-Pcr Of 11 Genes (7 Content And 4 Housekeeping), Util
C67.9
               Malignant neoplasm of bladder, unspecified
                                                                                                              81518
                                                                                                                              Oncology (Breast), Mrna, Gene Expression Profiling By Real-Time Rt-Pcr Of 11 Genes (7 Content And 4 Housekeeping), Util
C68.0
