CMS REQUIREMENTS	**STATE/FEDERAL REQUIREMENTS**		**APPLICABLE LINES OF BUSINESS** Commercial, Exchange, Medicaid	

I. PURPOSE

To define and describe the accepted indications for Intravenous Immune Globulin (IG) usage in the treatment of cancer, including FDA approved indications, and off-label indications.

New Century Health (NCH) is responsible for processing all medication requests from network ordering providers. Medications not authorized by NCH may be deemed as not approvable and therefore not reimbursable.

The use of this drug must be supported by one of the following: FDA approved product labeling, CMS-approved compendia, National Comprehensive Cancer Network (NCCN), American Society of Clinical Oncology (ASCO) clinical guidelines, or peer-reviewed literature that meets the requirements of the CMS Medicare Benefit Policy Manual Chapter 15.

II. INDICATIONS FOR USE/INCLUSION CRITERIA

A. PREFERRED MEDICATION GUIDANCE FOR INITIAL REQUEST:

1. When health plan Medicaid coverage provisions—including any applicable PDLs (Preferred Drug Lists)—conflict with the coverage provisions in this drug policy, health plan Medicaid coverage provisions take precedence per the Preferred Drug Guidelines OR

2. When health plan Exchange coverage provisions-including any applicable PDLs (Preferred Drug Lists)-conflict with the coverage provisions in this drug policy, health plan Exchange coverage provisions take precedence per the Preferred Drug Guidelines OR
3. For Health Plans that utilize NCH UM Oncology Clinical Policies as the initial clinical criteria, the Preferred Drug Guidelines shall follow NCH L1 Pathways when applicable, otherwise shall follow NCH drug policies AND
4. Continuation requests of previously approved, non-preferred medication are not subject to this provision AND
5. When applicable, generic alternatives are preferred over brand-name drugs.

B. Non- Familial/Acquired/Secondary Hypogammaglobulinemia (e.g., that is associated with Chronic Lymphocytic Leukemia, Multiple Myeloma, or post hematopoietic stem cell transplant

1. The member has B-cell CLL/SLL, multiple myeloma, or is post Hematopoietic Stem Cell Transplant with a documented history of recurrent bacterial infections and a low IgG level (< 600 mg/dL) prior to intravenous immune globulin (IG) replacement.
    a. For initial requests: The member has a documented IgG level < 600 mg/dL within the last 4 weeks OR a documented history of frequent sino-bronchial, skin, other site bacterial infections, OR is clinically felt to be immunocompromised.
    b. For continuation requests:
        i. The member has had a documented clinical benefit from IVIG therapy, e.g., reduced incidence of infections OR
        ii. The member has a history of an increase in recurrent infections within the last 6 months.

C. Idiopathic Thrombocytopenic Purpura (ITP)

1. Intravenous Immune Globulin (IG) may be used for members with a suspected/confirmed diagnosis of ITP and the platelet count is less than ≤ 30,000 cell/mL.

III. EXCLUSION CRITERIA

A. For CLL/Multiple Myeloma/Acquired Hypogammaglobulinemia the dosing exceeds 400 mg/kg for each dose and the frequency of administration is more frequent than once every 28 days.

B. For ITP, the dosing exceeds 400 mg/kg daily x 5 days or 1 gm/kg x 1-2 days.

C. Indications not supported by CMS recognized compendia or acceptable peer reviewed literature.

IV. MEDICATION MANAGEMENT

A. Please refer to the FDA label/package insert for details regarding these topics.

V. APPROVAL AUTHORITY

A. Review – Utilization Management Department

B. Final Approval – Utilization Management Committee
